

Probuild awarded Queensland's largest CBD excavation contract

Destination Brisbane Consortium has announced Probuild as the successful tenderer for the excavation works package at Queen's Wharf Brisbane.

Excavation works will run for approximately 18 months. During this time Probuild will undertake the equivalent of 5 basement levels of excavation - up to 26m deep.

450,000m³ worth of material will be removed, including a substantial quantity of rock called Brisbane Tuff – a harder, more weathered type of rock.

"We're pleased to have been appointed preferred contractor for the excavation works package at Queens Wharf," said Probuild's Managing Director for Queensland, Jeff Wellburn.

"Being involved in the early stages of the project, via the demolition works, allowed us to develop a deep understanding of the Queen's Wharf project and stakeholder needs."

"To be involved again, in the state's biggest-ever CBD basement retention and excavation project, is an achievement for Probuild. Queens Wharf is an important part of our city's history and we're proud to be delivering the next stage of it."

When the core of the development is complete in 2022, the basement excavation will provide thousands of carparks that provide direct access to the Queen's Wharf Brisbane precinct.

Excavation work is expected to begin in early 2018.
